Florian GRIMA

Lyon • +33 7 75 72 41 84 • florian.grima@epitech.eu • linkedin.com/in/florian-grima

ML Engineer

With 4 years of experience in software engineering and AI consultation, expertise includes backend architecture, workflow optimization, and student engagement in complex concepts. Successfully developed educational programs utilizing Python and PyTorch resulting in improved project outcomes. Skilled in AI implementation strategies.

WORK EXPERIENCE

TAKER **01/2026 - 08/2026**
AI Consultant **Lyon, France**

- Developed an internal RAG tool integrated with company Notion
- Established and optimized AI tools in the company's workflow, achieving a 30% increase in productivity within 6 months through targeted training and support.
- Designed and implemented an AI workflow architecture for the communication department, enhancing collaboration and efficiency within 3 months.

EPITECH **09/2025 - 08/2026**
Teacher assistant • Internship **Lyon, France**

- Evaluated and graded AI projects for 4 cohorts at EPITECH, enhancing student skills in C, C++, Python, NodeJS, and PyTorch over 12 months.
- Developed an AI workshop program within 6 months, enhancing student comprehension of complex concepts by integrating modern tools like Python and PyTorch.
- Implemented innovative teaching strategies that improved student engagement by 35% over 12 months, utilizing modern tools and collaborative techniques.

Bulltribe **09/2024 - 03/2025**
Fullstack engineer • Freelancer **Marseille, France**

- Transformed backend architecture by migrating from JavaScript to TypeScript, enhancing code maintainability and reducing bugs by 20% within 3 months.
- Enhanced backend communication with Firebase, reducing response times by 70% through optimized query handling within 3 months.
- Redesigned the mobile application interface, enhancing user experience and engagement by 60% within 4 months through user feedback integration.

Gamercraft **07/2022 - 05/2024**
Fullstack engineer **Marseille, France**

- Implemented a competitive gaming performance tracking tool, improving user retention by 15% through enhanced analytics and feedback integration within 3 months.
- Developed a dedicated AWS workflow connecting front-end, back-end, and data science stacks, enhancing system integration and efficiency within 4 months.

EDUCATION

Master's Degree in Information Technology + Certified Software Engineering Expert (RNCP Level 7)
Epitech — Marseille and Paris • 01/2021 - 01/2026

International exchange year
Laval university — Québec City • 01/2024 - 01/2025

CERTIFICATIONS

Expert in Computer Science 09/2021 - 08/2026

PROJECTS

LibrOpen - Final-year project

A web application for sharing personal projects, discovering open-source work, and giving builders more visibility.

Next.js / Typescript / AdonisJS / Postgresql / Python

Energizer

A machine learning library optimized for Apple chips. Exploring the connection between model performance and the hardware underneath.

Python / PyTorch / Metal / CUDA

P.A.R.S.E

Taker

An internal RAG tool that connects company knowledge in Notion to an AI retrieval workflow.

RAG / Pytorch / Python / TensorFlow

R-Type - Jeu en réseau C++

A multiplayer side-scrolling shooter built from scratch in C++ and SFML.

C++

SKILLS

AI Workflows, Anthropic API, Automated Evaluation, Communication Skills, Databricks, Data Pipelines, Data Science, Generative AI, Information Retrieval, LangChain, LlamaIndex, Natural Language Processing, pgvector, RAG Pipelines, Regression Suites, Software Engineering, vLLM

Languages: English, French (native), Spanish

Progamming languages: C, C#, C++, Javascript, Python, Rust, SQL, Typescript

Frameworks & tools: AdonisJS, AWS Lambda, AWS (Serverless), CUDA, Git, LLM, Next.js, Node.js, ONNX, PostgreSQL, PyTorch, React, REST API, TensorFlow, Vue
